We have all heard about the elusive spider bull but how about the spidy buck. I have seen the video and still pictures of this buck it's definitely a dandy. Has anyone been lucky enough to stick him with an arrow yet?

Here's your picture of the "Spidey Buck". I'm with you on the name thing. This is a great deer with deep forks but how you correlate that with a spider is beyond me...:huh:

Nice buck!! We are still in pursuit of the monster Governors tag buck for Troy Boy here in Utah. So if any of you come across a monster let us know. He does have a finders fee being offered. He is ready to do the carbon wack and stack on the heman woman hater buck...
